

## Task 1

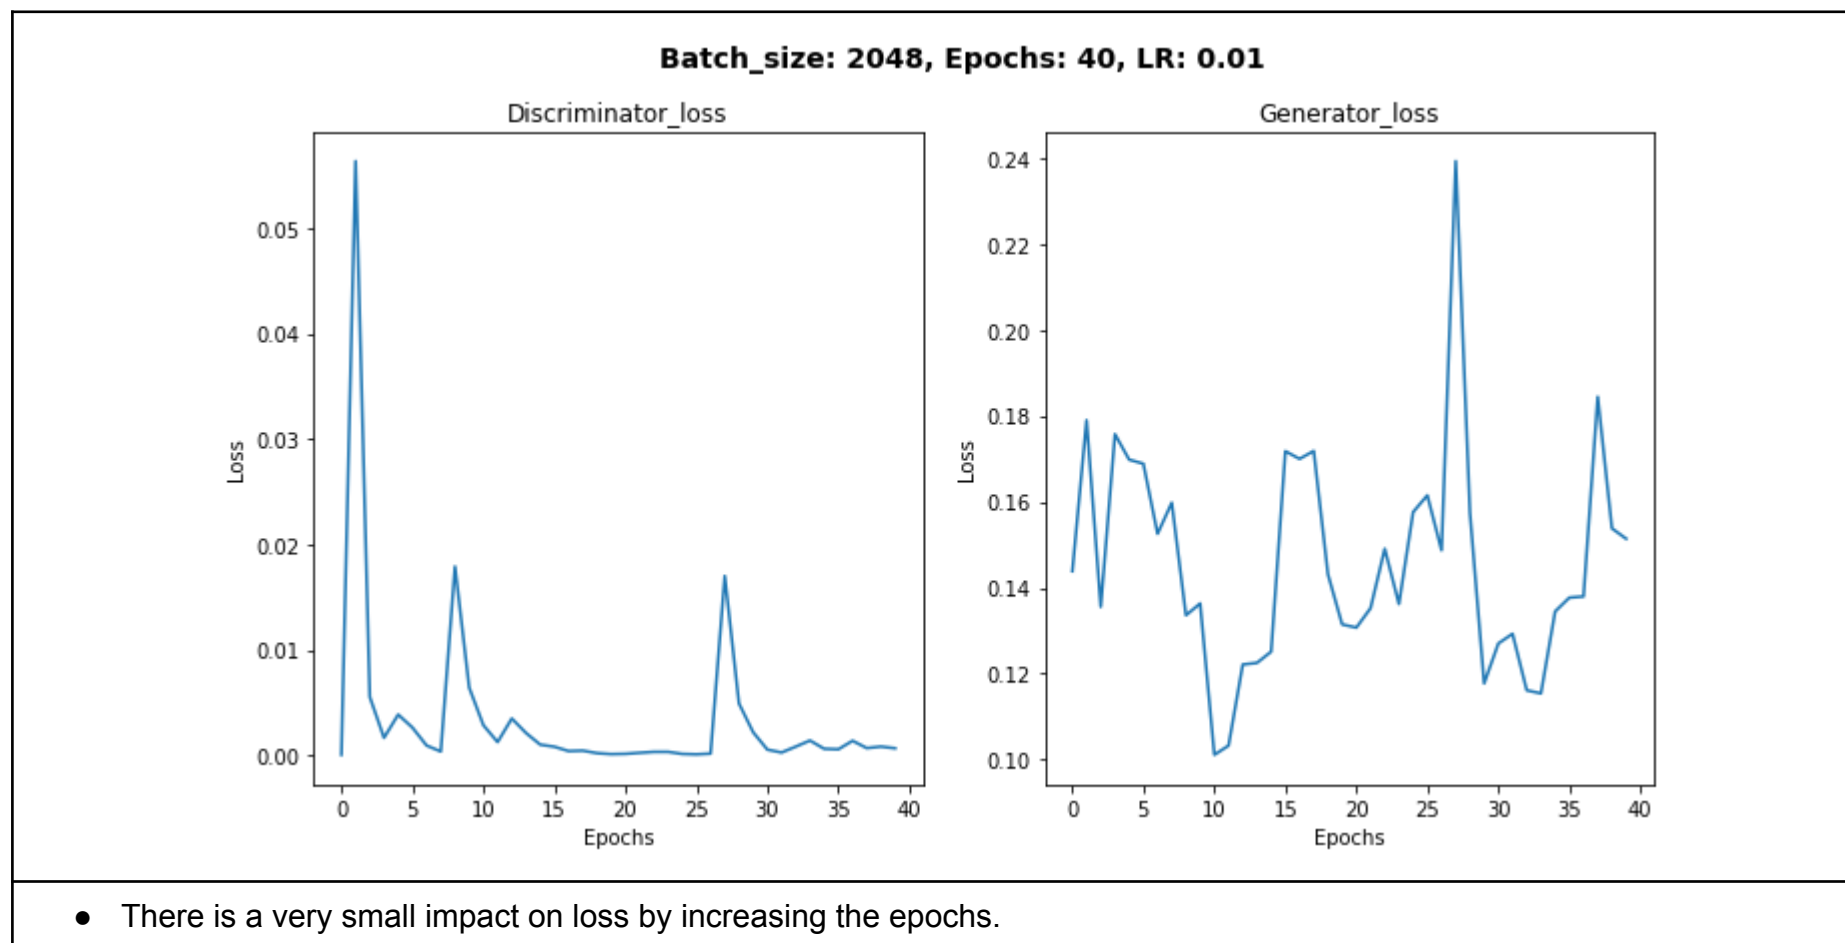

### 1. Loss Curves

## 2. Batch Size

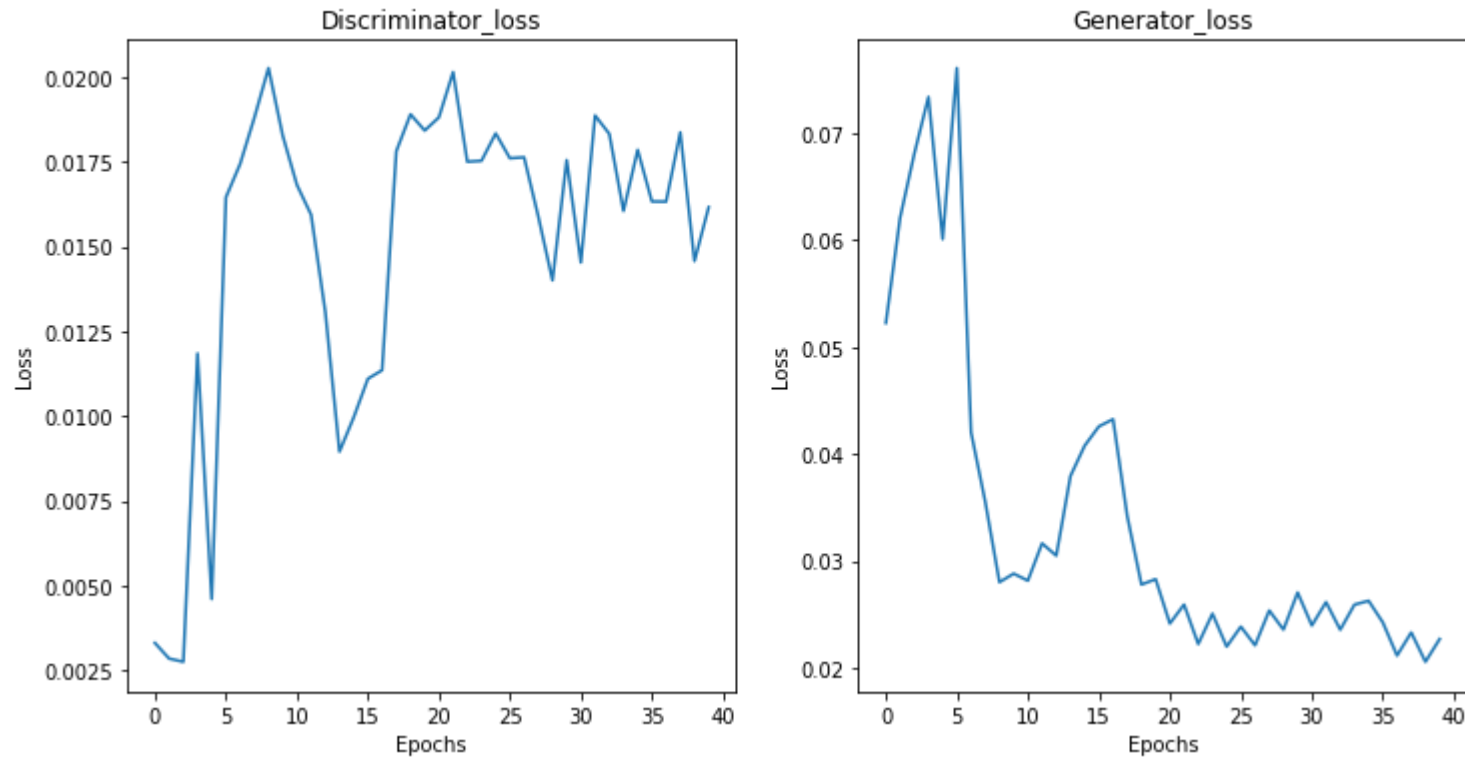

### 3. Epochs

#### 4. Optimizers

Optimizer changed from Adam to SGD

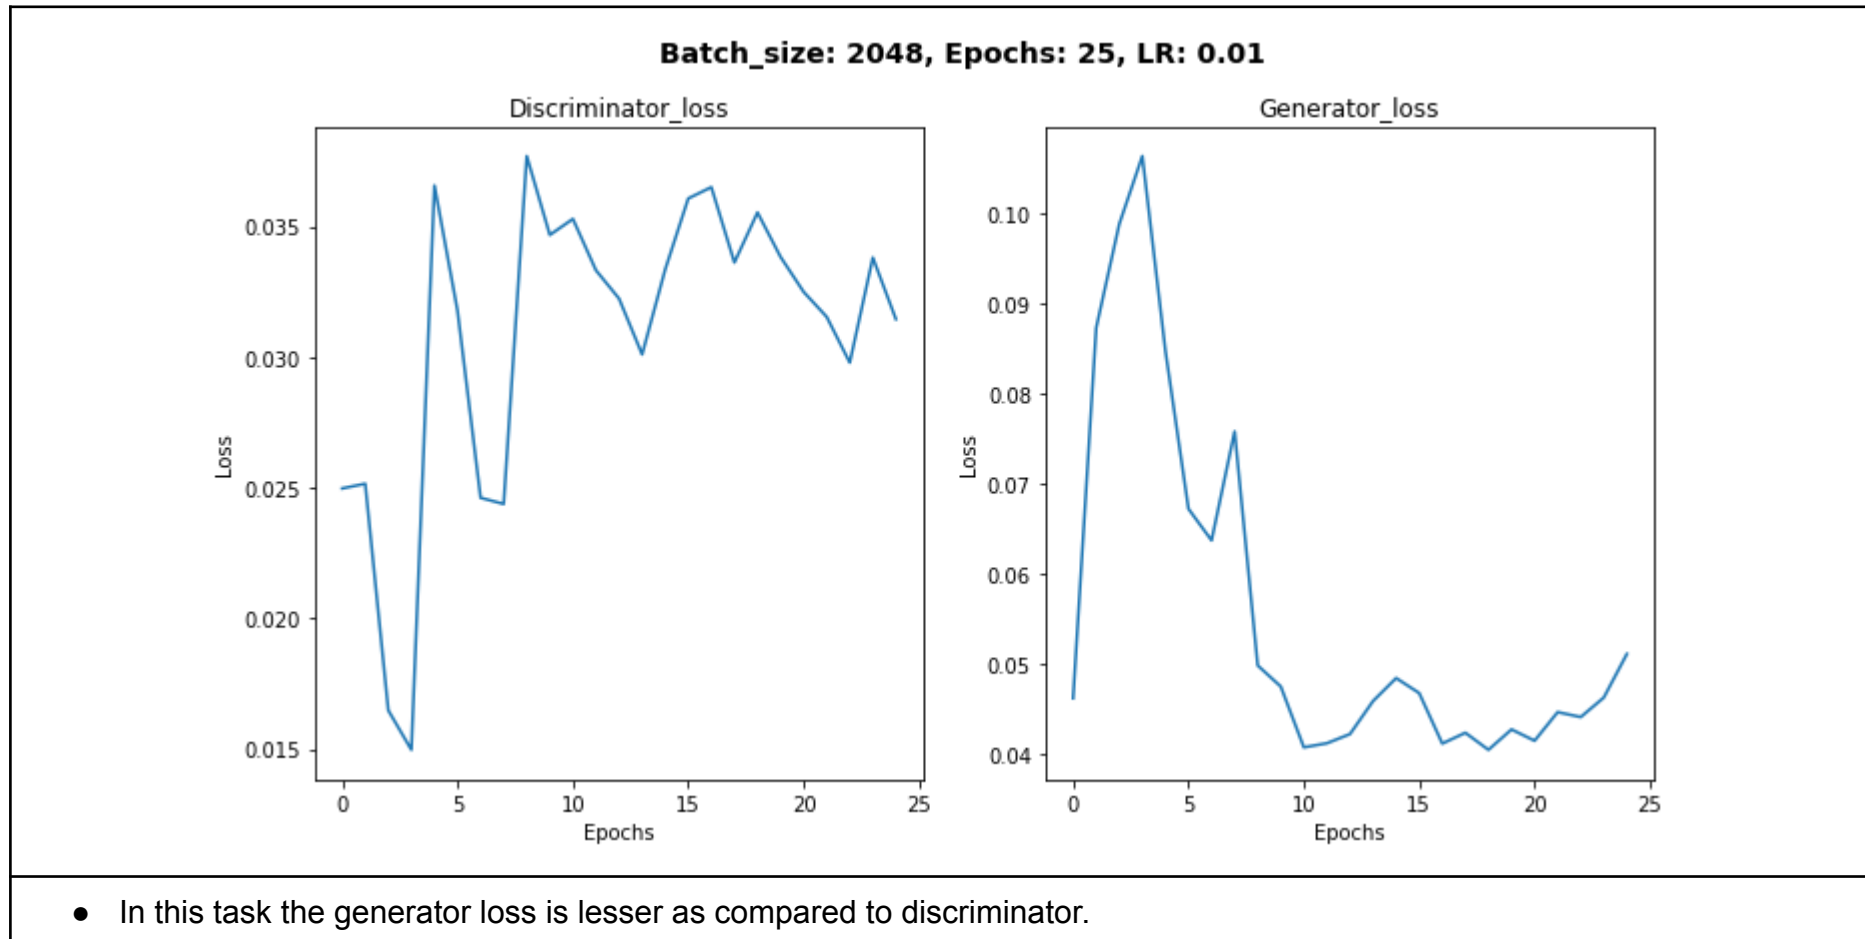

**Batch\_size: 2048, Epochs: 40, LR: 0.01**

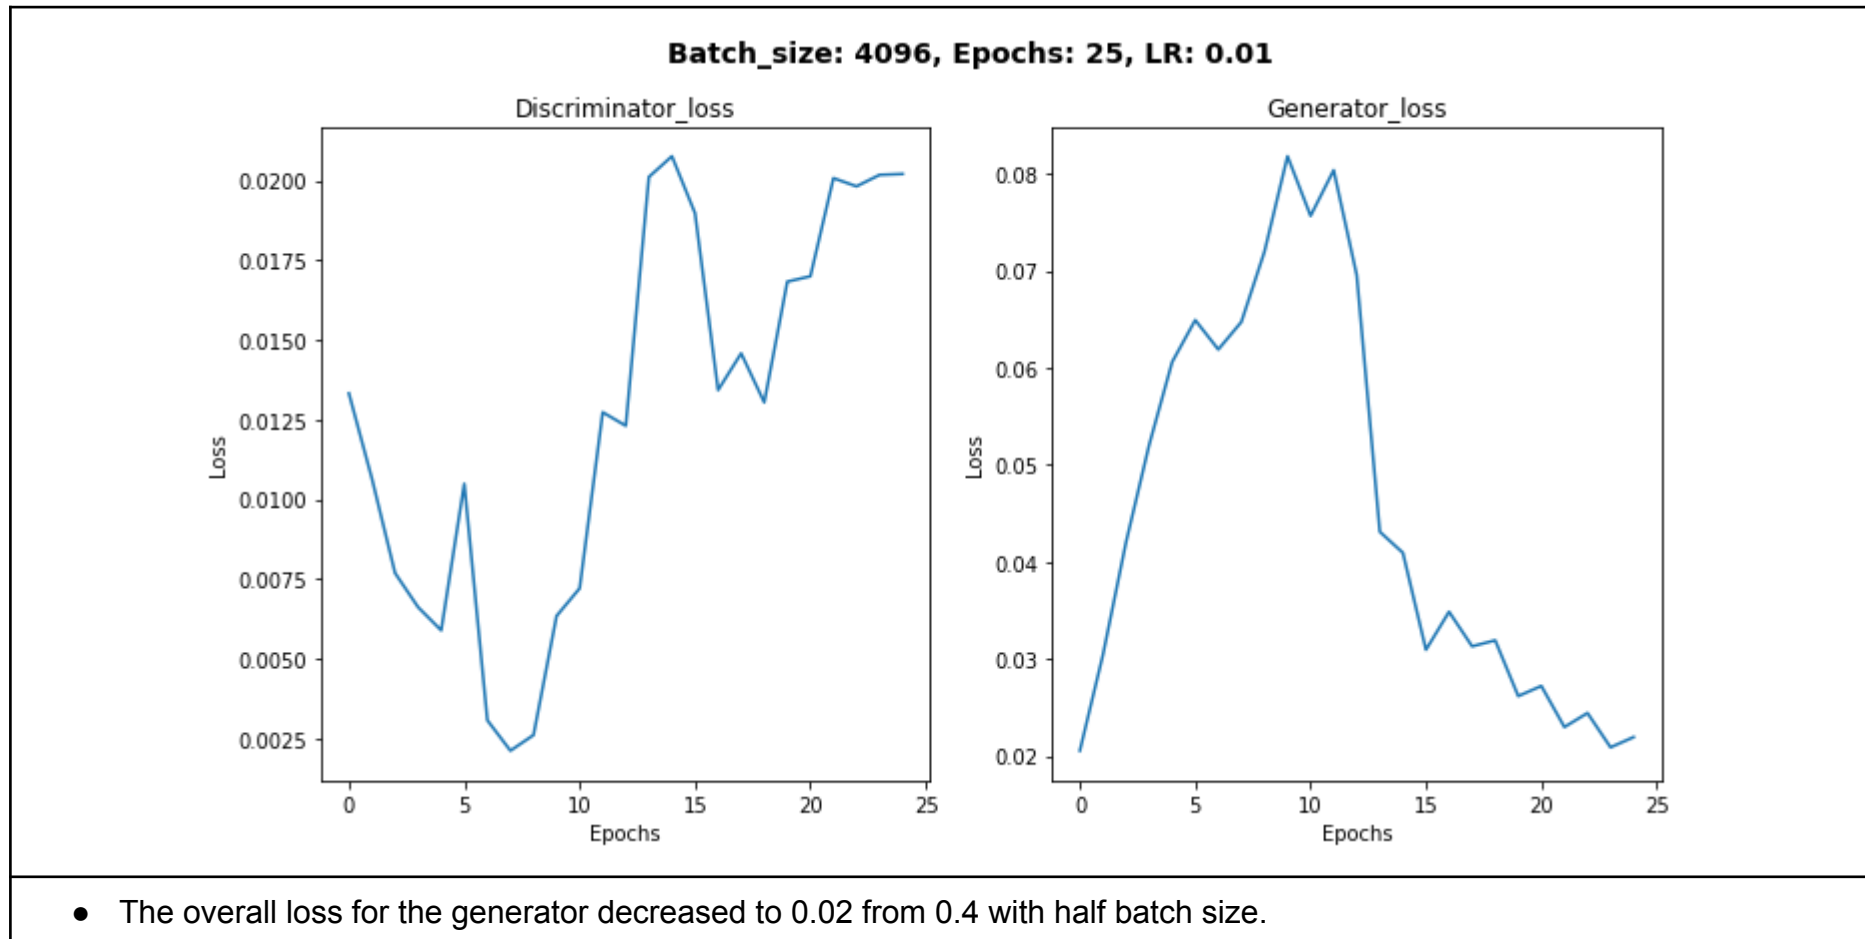

- With SGD the loss for the Generator decreased to 0.02 and the loss of discriminator was also close to 0.02 which means the generator produces better images when trained with SGD.

## Task 2

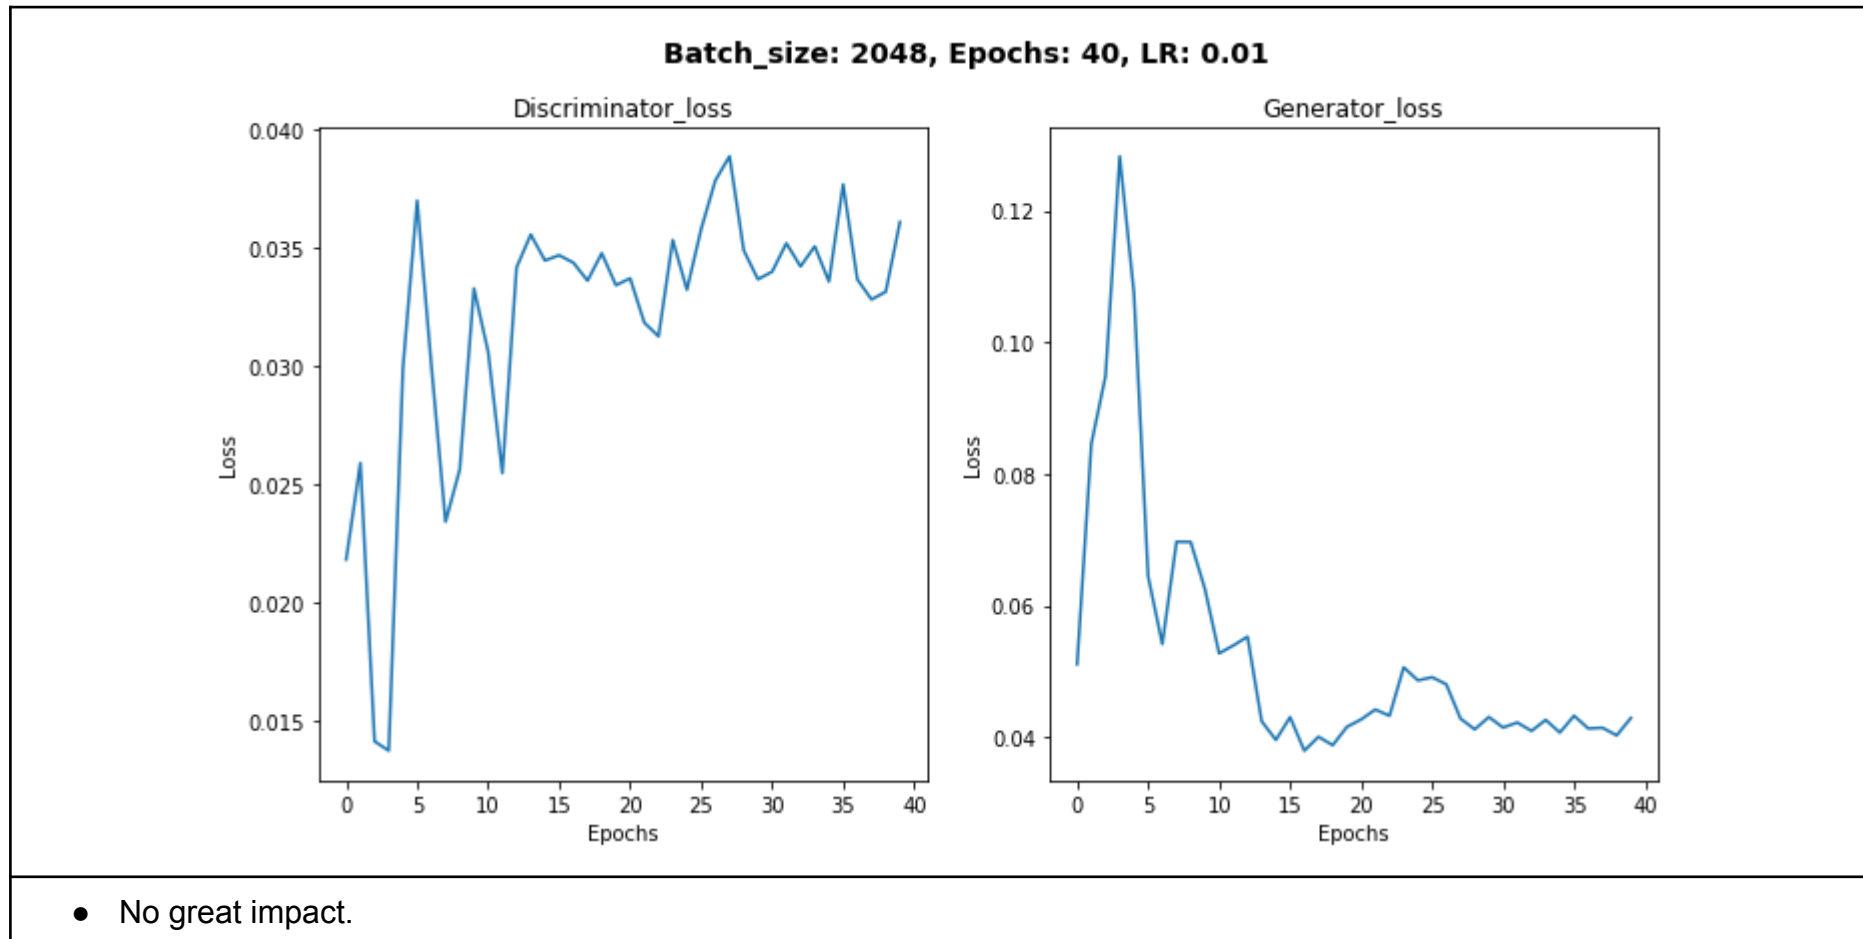

### 1. Loss Curves

## 2. Batch Size

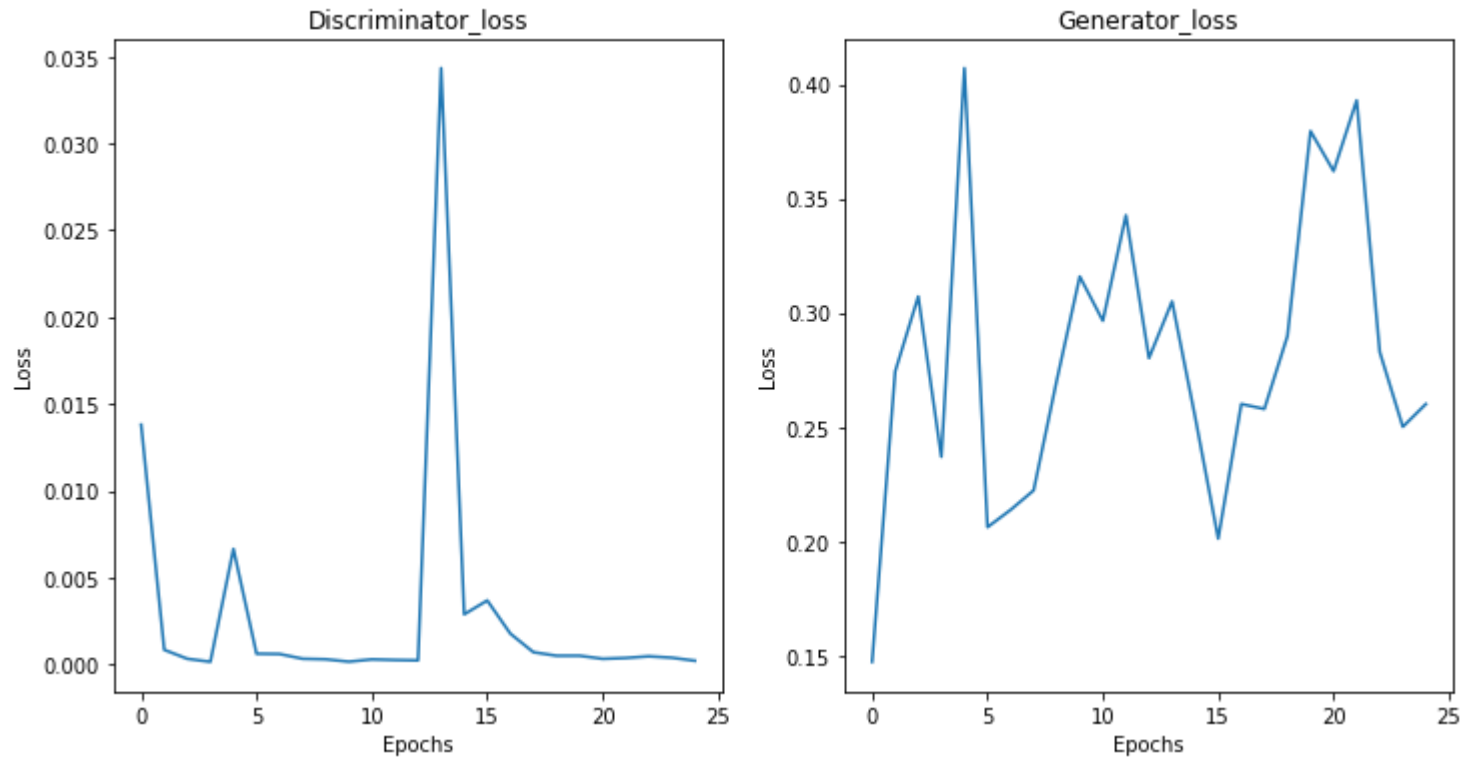

### 3. Epochs

#### 4. Optimizers

The optimizer was changed from SGD to Adam

**Batch\_size: 2048, Epochs: 25, LR: 0.01**

- Similar to previous task the loss increased with Adam optimizer.
